

Driving tomorrow's technology.

Monimax 8700

The **Monimax 8700™** is the industry's most advanced and full-function self-service solution, featuring the largest ATM multi-touch screen available, and providing both intelligent cash and bulk-cheque deposit, and cash recycling options. Designed to support efficient banking operations, the **Monimax 8700** uses separate deposit acceptance slots to avoid any single points of failure.

Cheques are conveniently deposited into the secure top hatch, allowing service staff to easily process cheques without requiring access to the safe.

With the largest multi-touch screen available on any ATM in Australia, the **Monimax 8700** allows for the development of truly engaging and innovative self-service functionality – finally permitting the ATM to become an integrated component of your channel strategy.

Engage your customers

The **Monimax 8700** features a large 21.5" multi-touch screen that opens up the ATM to a range of new functionality including product and service applications, customer data management, and interactive customer advertising and offers. Considering that up to 50% of customers using your ATM might be from other financial institutions, **Monimax 8700** can become a powerful acquisition tool.

Optional second 12" LCD screen

The **Monimax 8700** features a second smaller LCD screen for advertising your products and services.

Flexibility to meet the needs of the future

The **Monimax 8700** features an open architecture modular design providing the flexibility to take advantage of current and future capabilities including touch screens, barcode readers, and contactless card readers.

Reliability for maximum service at the lowest operating cost

Put through the industry's most stringent testing, the **Monimax 8700** has been built for high uptime in Australia's extreme conditions. Able to integrate into a range of remote monitoring platforms, the **Monimax 8700** is designed to permit fast repairs and maintenance – delivering a dependable interaction for your customers.
