Value delivered

New Branch Solution

A totally new and innovative solution offering maximum productivity to the branch and productivity, security, and great service to consumers

Features

- **Maximize Branch Productivity** – Monimax8800 is designed to optimize time and resources, migrating a high percentage of routine transactions to self-service. Efficiency is maximized by allowing tellers to focus on offering sales of other bank products as well as interactive service while customers perform self-service functions.

Consumers build confidence in their financial institution's brand as they are productive, secure, and receive great service in an environment where processes and people compliment the technology.

- **Productive** : The consumer executes a wide range of transactions rapidly either completely via self-service, or with the assistance of an institution representative. An impressive list of standard hardware features, integration possibilities, and the appropriate level of personal engagement enables them to maximize the time spent in the branch.
- **Secure** : Central to a successful program is giving the consumer a sense that their information and person are secure. The MX8800 includes unique design elements that allow for the presentation and input of information in a secure manner.
- **Great Service** : The consumer enjoys a great service experience as they are able to be productive and at the same time enjoy the appropriate level of personal engagement they've come to expect by the branch experience.
- **Flexibility** – A wide variety of configuration and integration options enable the MX8800 to be tailored to the unique functional capabilities required by the institution. From displays, media acceptance, integration, and delivering the right level of personal interaction either in person or via a video link, Nautilus Hyosung can deliver the approach that best suits your institution.
