---

## PAY STATION

## Paypod™ Embedded

### Description

Paypod Pay Station helps retailers with cash handling at the point of sale. Customers process the transaction while employees complete the order. By automating payment, retailers can limit hygienic issues and time spent on reconciling while improving throughput.

Paypod Embedded easily fits under standard retail counters. The robust, hardened design is secure with a lockable enclosure door, lockable banknote recycler cashbox, and a dual-locking feature on the coin recycler. The rolling cart with swivel base provides 360° access to the cash devices from behind the counter.

Realize [payment automation](#) at your store today.

# Benefits

---

**Save time by enhancing operational efficiency** and minimizing manual cash handling

**Increase control** with a secure enclosure that reduces shrink and eliminates counterfeits

**Improve hygiene** by allowing food to be handled by employees and cash to be handled by customers

**Integrate seamlessly** with your existing point-of-sale system

# Variants

---

## **Paypod Embedded E22**

Paypod E22 Embedded Enclosure, CLS Coin Recycler, SCR Advance™ Banknote Recycler

The E22 provides sequential note dispensing and counterfeit rejection in an enclosure that is height adjustable under the counter
